

Code	Description
202991	PLUG & WASTE POP UP W/-HAIR CATCHER 32&40MM SHORT TAIL BSH/NI

## Installation instruction sheet

To the installing Plumber:

Due to the design of this Pop-Up Waste with Hair Catcher (181535) it is difficult to determine if the waste has sealed to the basin surface when the basin is not holding water.

A conventional waste would show signs of leaking on the underside of the basin if the upper seal is leaking whereas this design waste the water leaks into the 32mm to 40mm outer housing and then into the S&P Trap where the water leak cannot be seen giving the impression the black rubber seal on the Pop-Up assembly is not working.

To overcome this issue it is recommended a plumbing grade silicone is used on the top and bottom of both the Upper silicone seal and Lower silicone seal to ensure the waste is sealed against the basin surface correctly.
