

ASCR Round Mirror Cabinet Installation Guide

The ASCR features a W400 x H400 x D150mm cabinet with a 600mm round mirror.

Please note: Due to the design of the cabinet with the round door on the square cabinet and the position of the hinges the cabinet cannot be recessed into the wall.

Installation Steps:

1. Mount the metal plates to the wall using the wall plugs and screws provided. The solid piece of the plate should be positioned away from the wall so the hanger on the cabinet can clip over this.
2. Loosen the bottom screw on the plates inside the cabinet to loosen the hanger. Once both hangers are hanging out the back of the cabinet, mount the cabinet on to the two plates on the wall. You may need someone to assist you with holding the cabinet in position while you tighten the top and bottom screws inside the cabinet to ensure the cabinet is secure on the wall.
3. Insert the adjustable shelf supports into the holes in the desired position and insert the shelf.

Care and Maintenance:

For best results clean mirror with methylated spirits and water at a rate of 30% methylated spirits and 70% water. Do not use Windex or similar cleaning products. Avoid getting water on the sides or back of the mirror as damage to the silver backing can occur. In coastal areas it is recommended to wipe around the edge of the mirror regularly to avoid salt build up that can cause silver creep.
