NR162210a(185/230)tGR

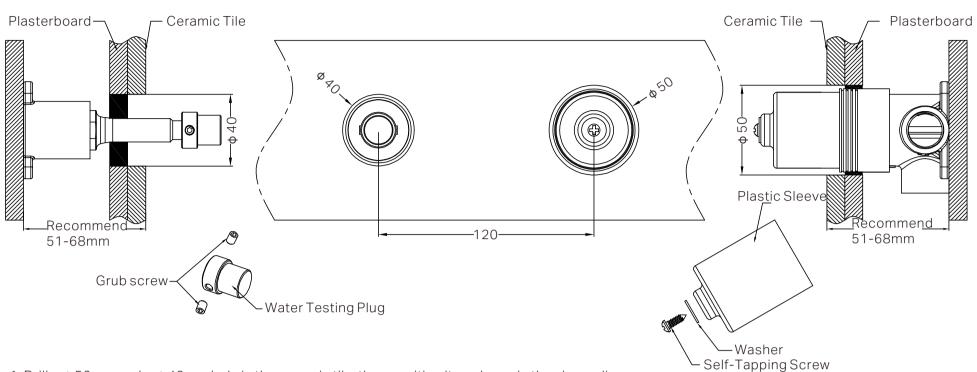

Brushed Nickel NR162210a(185/230)tBN

<sup>\*</sup>Dimensions are nominal measurements only.

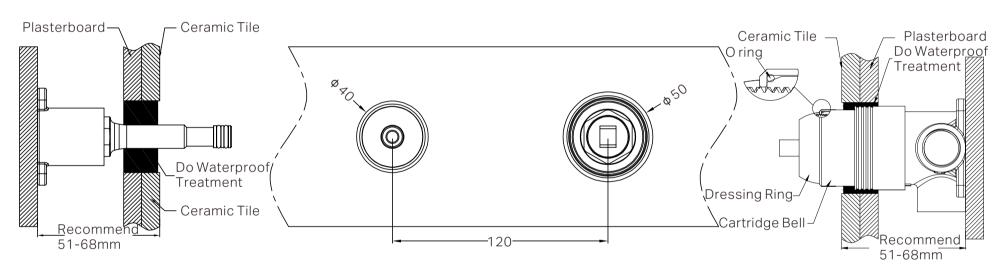

# Installation Instruction

#### **GENERAL INSTRUCTIONS:**

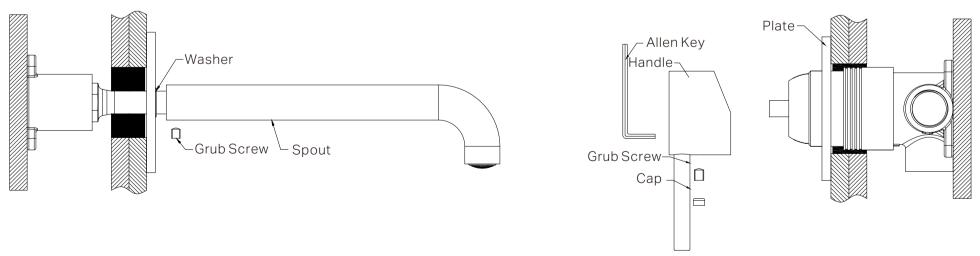

- This product must be installed by a licensed plumber. Ensure that your plumbing installation conforms to the Australian/New Zealand Standard AS/NZS 3500.
- All pipework must be thoroughly flushed prior to the installation of the mixer. In-line filters must be fitted on both hot and cold supplies to prevent foreign particles from damaging the ceramic cartridge.
- All outlets used primarily for personal hygiene must deliver water at a safe temperature in accordance with regional regulations.

- 1. Drill a  $\phi$  50mm and a  $\phi$  40mm hole in the ceramic tile, then position it as shown in the above diagram.
- 2. Undo the self-taping screw to remove the plastic sleeve, and release the grub screws to remove the water testing plug.

- 3. Insert the O ring to the cartridge bell groove, and slide the dressing ring onto cartridge.
- 4. Apply waterproof treatment to the area indicated in the diagram above.
- 5. Tighten up the dressing ring on the cartridge bell.

- 6. Slide the backplate and washer onto the wall, set the spout in place, and secure it tightly using the grub screw.
- 7. Position the handle, tighten it with a grub screw using an Allen key, and cap the grub screw hole.

Please note: there is a washer between backplate and the spout.

## MAINTENANCE AND CARE:

- Regularly check the mixer and connections for signs of wear or leaks.
- Clean the tap with mild soapy water to maintain its appearance, avoiding harsh chemicals and abrasive materials that may damage the finish.

## FINAL INSPECTION:

- Ensure the tap operates smoothly and that there are no leaks at the connections.
- Clean the area and the newly installed tap with a soft cloth to remove any installation residues.
