# SS316L 35mm Premium Universal Wall Basin/Bath Mixer

### Nero

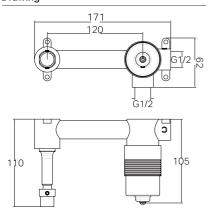

### **Body Only**

Versions:202405

### Drawing

### Specifications

Watermark License
NRUB005
Temperature Rating
Min 1°C-Max 75°C
Pressure Rating
Min 150kpa - Max 500kpa

### Packaging Includes

1x Mixer Body

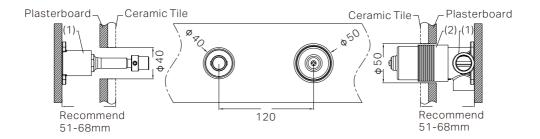

<sup>\*</sup>Dimensions are nominal measurements only.

<sup>\*\*</sup>Only compatible with all SS316L bath / shower mixers

## Installation Instruction For Body

#### **GENERAL INSTRUCTIONS:**

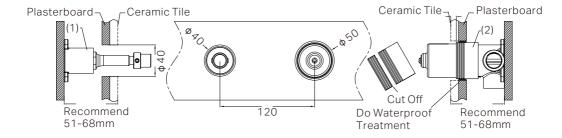

- This product must be installed by a licensed plumber. Ensure that your plumbing installation conforms to the Australian/New Zealand Standard AS/NZS 3500.
- All pipework must be thoroughly flushed prior to the installation of the mixer. In-line filters must be fitted on both hot and cold supplies to prevent foreign particles from damaging the ceramic cartridge.
- All outlets used primarily for personal hygiene must deliver water at a safe temperature in accordance with regional regulations.

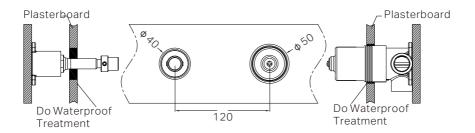

1. Secure the mixer body (1) to the nogging, ensuring an installation depth of 51-68mm from the nogging to the ceramic tile.

Note: Do not remove the plastic sleeve (2) from the mixer body.

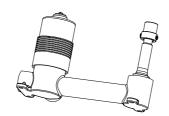

- 2. Connect the cold and hot water supply lines and perform a leak test.
- 3. Drill a  $\phi$ 50mm and a  $\phi$ 40mm hole in the plasterboard for mixer body installation, and then position the plasterboard as shown in the above image.

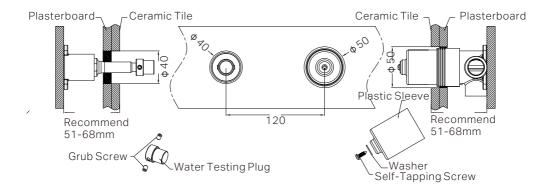

- 4. Mark the plastic sleeve (2) 4-7mm from the ceramic tile surface to the body and waterproof the gap between the plasterboard and body.
- 5. Remove the self-tapping screw, washer, and plastic sleeve, then cut the sleeve at the marked point.
- 6. Reattach the self-tapping screw, washer, and plastic sleeve.

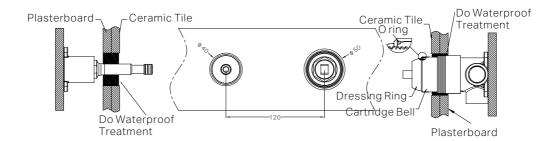

7. Waterproof the gap between the plasterboard and body.

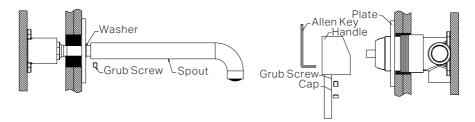

# Installation Instruction For Trim Kits Only

- 1. Drill a  $\phi$ 50mm and a  $\phi$ 40mm hole in the ceramic tile, then position it as shown in the above diagram.
- 2. Undo the self-taping screw to remove the plastic sleeve, and release the grub screws to remove the water testing plug.

- 3. Insert the Oring to the cartridge bell groove, and screw the cartridge bell onto cartridge.
- 4. Apply waterproof treatment to the area indicated in the diagram above.
- 5. Screw the dressing ring onto the cartridge bell.

- 6. Slide the backplate and washer onto the wall, set the spout in place, and secure it tightly using the grub screw.
- 7. Position the handle, tighten it with a grub screw using an Allen key, and cap the grub screw hole.

Please note: there is a washer between backplate and the spout.

### MAINTENANCE AND CARE:

- Regularly check the mixer and connections for signs of wear or leaks.
- Clean the tap with mild soapy water to maintain its appearance, avoiding harsh chemicals and abrasive materials that may damage the finish.

#### FINAL INSPECTION:

- Ensure the tap operates smoothly and that there are no leaks at the connections.
- Clean the area and the newly installed tap with a soft cloth to remove any installation residues.
