Check the product is complete with all components required to install.

This product is to only be installed by a licensed plumber, failing to do so will void warranty.

This product is to be installed as per Australian Standard and local authority requirements.

BASIN INSTALLATION WITH FIXING KIT

IMPORTANT:

Provide suitable reinforcement behind finished wall for the basin Fixing at the fixing height position.

Roughing in for Fixing Kit :

For timber stud walls, noggins and studs must be positioned at the required height to allow for the location of the basin fixing screw bolts .

- 1.Mark fixing screw bolt hole position on finished wall at the required height (refer 'basin hole Position' drawing).
 - 2.Drill two holes in the stud wall.
 - 3.Prior to fitting the basin it is recommended the tapware is assembled to the basin for ease of assembly.
 - 4.Screw bolts into stud wall until timber screw thread is in line with finished wall.
 - 5.Slide basin onto the protruding Fixing bolts, Insert plastic bushes so the bush is separating the metal bolt from the basin surface.
 - 6.Fit metal washers and fasten with supplied Hex Nuts.
- N.B – DO NOT OVER TIGHTEN HEX NUTS as this may cause the basin to crack.**
- 7.Connect Basin to drainage system as per Australian standards and local authority requirements.
 - 8.Connect tapware to mains water supply.
